

Thermex Top Link Module III

Item number: 536.99.1350.9

€ 384,08

EAN: 5703347530098

With Thermex Top Link® you don't have to remember to switch your hood on and off - Thermex Top Link® does it for you

Now it's easy to get extra comfort in the kitchen with the intelligent control **Top Link®**, which wirelessly connects the hob and container or oven and container together. Thermex Top Link® fits all electric hobs - traditional or with induction - as well as all ovens regardless of make. Top Link® works with radio waves and can therefore be placed under all types of worktops, including granite or concrete. Thermex Top Link® sends a wireless signal to the receiver when you switch on the hob or oven. When the hob or oven is switched off, the collection continues and removes the last food before switching off completely. ATTENTION You can override the Top Link® function at any time with the hood's operation.

Thermex Link
